4-20mA Type Outdoor Humidity Transmitter

Monitor humidity in harsh locations

This humidity transmitter can be used with Sensaphone models that accept a 4-20mA signal to detect humidity levels. The device will cause your Sensaphone to activate an alarm when the humidity level reaches a set threshold. With a range of 0% to 100% RH level, the sensor causes an alarm when the humidity exceeds or falls below the set limit. The sensor is mounted in a weatherproof enclosure to allow for mounting in harsh locations.
